Comments: I only saw the tree station and the opening lesson plans. The tree station was great. It was fun hanging with you all. I liked how, when it worked, the 5 min suspended sit spot re-focused the groups.

The intro, in my opinion, seemed too slow and set the day off with little excitement from you all. However the energy level did improve every week. When you all relaxed, the intro felt more natural and comfortable.

3.) The overall experience students had at the site was:

1 2 3 4 5 6 7 8 9 **10**

Poor

Excellent

Comments It is always amazing to see people's reactions when they enter a tree. I think it was life changing for many of the participants.

In what area did the Canopy Connections team perform particularly well?

Facilitating a lesson plan around watersheds is not easy. You all made the lessons simple yet effective .

In what area does the Canopy Connections team need to improve?

Not always remembering why we all were out there. In the end, its more about the kids having a great day playing in the wood and having a fund time, even if that's in the pouring rain, than fulfilling a classroom requirement to graduate.

Would you be interested in participating in the program next year? **YES NO**

Any Additional Comments?

Overall very well done, I hope you all come hang out in Blue River this summer we still need to do a big tree climb.
